

# LEXANTM HPXXS FILM

# PRODUCT DATASHEET

### **DESCRIPTION**

LEXAN HPxxS graphic films are high-performance coated films offering very good chemical and abrasion resistance together with unique processing characteristics. These highly durable, easily printed films create new opportunities in graphic design with a unique package of benefits: Flexible UV processing, Multiple topside selective texturing, Color topside texturing, Durability of coating and texture adhesion when exposed to strong household chemicals such as Wisk¶ or Formula 409#.

| 0.010 - 0.015" (0.250 - 0.375mm) | -/+ 5%                    |
| 0.020 - 0.030" (0.500 - 0.750mm) | -/+ 3%                    |

#### **MASKING**

The standard masking on HP film is not designed to have UV radiation (for curing) passed through it. If this is required, alternate masking is available. Please contact your sales representative for more details.

### CHEMICAL AND ABRASION RESISTANCE

A unique feature of LEXAN<sup>TM</sup> HPxxS films is receptivity to multiple-pass, first-surface decoration for selective textures and/or color graphics. This feature requires that the coating be chemically sensitive to a variety of ink formulations. As a result, the coating is subject to attack by aggressive industrial chemicals and some strong household cleaners. Both the chemical resistance and the hardness of the coating can be enhanced by exposing the coated surface of the film to UV ink curing conditions.

# TABER ABRASION RESISTANCE (ASTM D1044) LEXAN HP92S GRAPHIC FILM

| CONDITION<br>CS10F WHEEL, 500<br>GRAMS | UNITS            | AS MANUF. | POST<br>CURED <sup>‡</sup> |
